ABSTRACT

The Integrated Smart Alumni Networking and Career Support Portal is a web-based application developed to connect students, alumni, and educational institutions through a centralized platform. The main aim of this project is to strengthen the relationship between current students and alumni while providing career guidance, professional networking, and employment opportunities. The system allows students and alumni to register, log in, create profiles, and interact with each other. Students can connect with experienced alumni to receive career guidance, mentorship, industry insights, and interview preparation support. Alumni can share their professional experiences, provide guidance, and post job and internship opportunities. The portal also enables students to explore career opportunities and improve their professional development. The system provides an organized platform for managing alumni information, maintaining communication, and sharing career-related resources. It helps institutions build a strong alumni network and encourages knowledge sharing between students and graduates. Overall, the proposed system aims to bridge the gap between academic education and industry requirements.
